DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/099,560, filed on March 14, 2002.

Drawings

2. The drawings filed on September 29, 2003 are acceptable to the examiner as formal drawings.

Specification

3. The disclosure is objected to because the specification should indicate on page 1, line 5 that the parent case is now U.S. Patent No. 6,702,262. Appropriate correction is required.

Election/Restrictions

4. This application contains claims directed to the following patentably distinct species of the claimed invention: (A) Figures 1, 2A, 2B; (B) Figures 3A, 3B; (C) Figures 4A, 4B; (D) Figures 5A, 5B; (E) Figures 6A, 6B; (F) Figure 7, and (G) Figure 8.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 8 appear to be generic.

Art Unit: 1724

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

5. Action on the merits of the claims is held in abeyance pending applicant's response. It is noted, however, that the phrase "ring-like" (claim 4, line 9; claim 5, line 7; claim 16, line 1) should perhaps be changed to --ring-shaped--. Note MPEP section 2173.05(b)F. Furthermore, the word --nozzle-- is apparently misspelled in claim 8, line 4.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard L. Chiesa whose telephone number is (571) 272-1154.

Art Unit: 1724

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Blaine R. Copenheaver, can be reached at (571) 272-1156.

Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1700 receptionist whose telephone number is (571) 272-0987.

Facsimile correspondence must be transmitted through (703) 872-9306.
